Discover our
highlights in hall 5
at stand D18!

Invitation

to the AQUA Suisse from 25 - 26 October 2023 at Zurich exhibition

We cordially invite you to AQUA Suisse to experience our latest product highlights up close. Visit us in hall 5 at STAND D18 and immerse yourself in the water world of innovative solutions.

The market is undergoing a fundamental change. There is an increasing focus on new efficient technologies for the grid-independent operation of sewer networks and systems. With the clamp-on flow measurement from FLEXIM on display, your flow measurement point is already measuring non-intrusively and completely self-sufficiently. Another highlight at the stand is the INKA road drainage system with self-sufficient gate valve and intelligent data communication via STEBAnet mobile. In addition, we will show you the proven LDM, the autarkic screen with water wheel drive and the updated process control system with new functions.
