

Here you programme the future as a **PCS/PLC programmer (m/f/d)**

STEBATEC Züllig AG is a pioneering company in the water and wastewater market with many public sector clients. Our team develops innovative automation solutions for water supply, road drainage and small hydroelectric power plants. We are also a leader in the measurement and control of municipal drinking water and industrial wastewater.

We are looking for a motivated person to work as a **PCS/PLC programmer (m/f/d)** at our **Rheineck SG** location, either immediately or by arrangement.

Your tasks

- Programming/configuration and maintenance, troubleshooting of control systems
- Creating PLC programs
- Implementing logging, data transmission, server environments and network technology for customer systems
- You will make suggestions for standardisation options
- As an automation engineer, you will work closely with assembly, project management, development, sales and external partners

What you can expect

You will work independently and with the most modern tools in a collegial, flexible team with short communication channels. You will take on responsibility, receive authority, help to further expand our market position and, in turn, have the opportunity to develop personally. STEBATEC Züllig AG offers attractive employment conditions and above-average social benefits.

Your profile

- Sound knowledge of PLC programming
- Experience in creating system visualisations is an advantage
- Basic knowledge of server and network technology
- Very good written and spoken German, other foreign languages are an advantage
- Competent and customer-oriented manner
- Strong communication skills, assertiveness, sense of duty and responsibility, flexibility and team spirit
- Category B driving licence
- Willingness to work on-call

Your job application

We look forward to receiving your full application, including your salary expectations.
